RRT-Husk chips 5KG block

Secret of Gardening RRT- Coco Peat Husk Chips Blocks!

Coconut husks are chipped into small sized chips called Coco Chips. Coco Chips are added to potting soil or mixed with Coco Peat to regulate the aeration of growing medium and maintain the ideal air to moisture ratio for the plant roots. Coco Chips can be mixed at different proportions with Coco Peat to regulate the aeration and moisture level of the growing medium.

RRT-Coir planting & seeding pots

🌱 Embracing Eco-Friendly Gardening! 🌱

Hey, fellow garden enthusiasts! 🌸 I recently discovered the wonders of coir plants and seeding pots, and I couldn't be more excited to share this eco-friendly gardening journey with you all! 🌍🌱

🥥 **Coir Plants:** Did you know coir, extracted from coconut husks, is an amazing natural fiber that's not just sustainable but also an excellent growing medium for plants? It retains water, provides great aeration, and is a fantastic alternative to traditional soil. My plants are thriving, and I love the eco-friendly touch it brings to my garden! 🌸

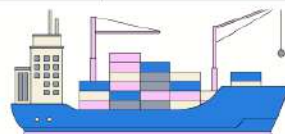

🌱 **Seeding Pots:** Say goodbye to plastic waste with seeding pots made from coir! Whether it's peat pots or coir pots, they are biodegradable and can be directly planted into the soil. Starting seeds in these pots reduces transplant shock and adds a sustainable touch to your gardening routine. 🌱♻️
